**Safe & Environmental
Friendly**

Overview

Platinum Ink is a high density and high gloss product. It strengthens the printing chromatography properties and improves the printing value-added through new ink technology to be used. It incorporates new vehicle system that makes a wider water window and provides excellent printability.

Offset Printing Blanket

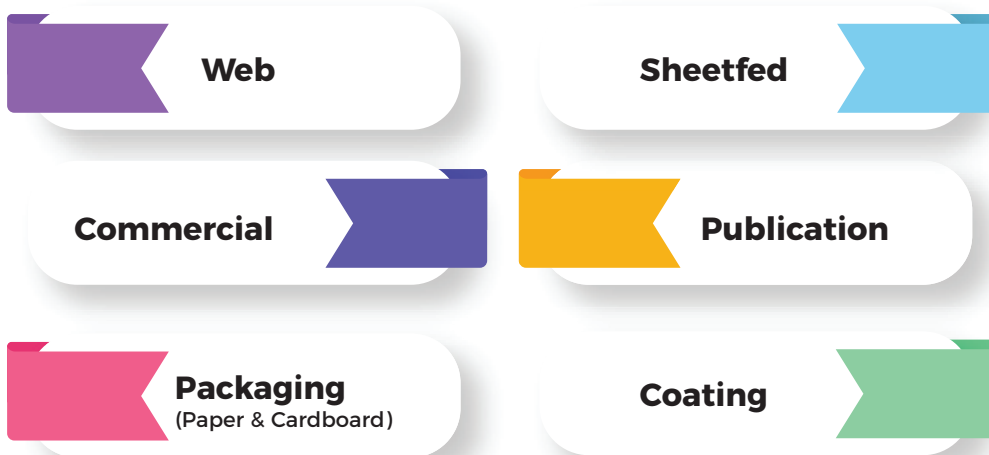

Trelleborg Printing Solution

Trelleborg delivers ideas for the long run with the blankets your printing requires. Trelleborg has a track record second to none when it comes to engineering materials and designing components to meet the ever-changing needs of the industry. Trelleborg **Rollin** Printing blankets are no exception.

Rollin Printing Blankets

Rollin blanket performs to make a truly excellent impression on your customers. Superior resistance to UV inks and washes, optimum Printing results on a variety of surfaces, and the durability that characterizes all Trelleborg products make **Rollin** blankets an outstanding choice.

Blanket for

- Reel Form
- Cut Blanket
- Cut Blanket with Bars
- Sticky Blanket

Over Printable Coating Solvent & Water base.

Eternal is one of the world's largest companies making and supplying chemicals and electrical chemical materials since 1964. The head Quarter in Taiwan and have 19 production sites all over the world. Eternal is the world's bigger supplier of Dry film Photo- resist with more than 40% market share. They are also the biggest supplier in China for UV raw materials.

Eternal offers a wide range of products for Printing and packaging such as over-coating resin in a solvent and water base on paper and board. Eternal is the primary manufacturer of its ingredients and thus they have strict control over the final product and quality consistency is guaranteed. R&D is continuously analyzing to give the best product considering environmental and safety concerns.

We offer a range of products depending on the final application. You could share the application so that the right product can be offered.

Plastic Decoration & Coating

- Note Book & Cell Phone
- Consumer Electronic
- Cosmetics
- Package

Applications

- Package (Food, Tobacco, Wine)
- Magazine (Docks Cover, Commercial)
- Cards
- Lables

Hot Stamping Foil

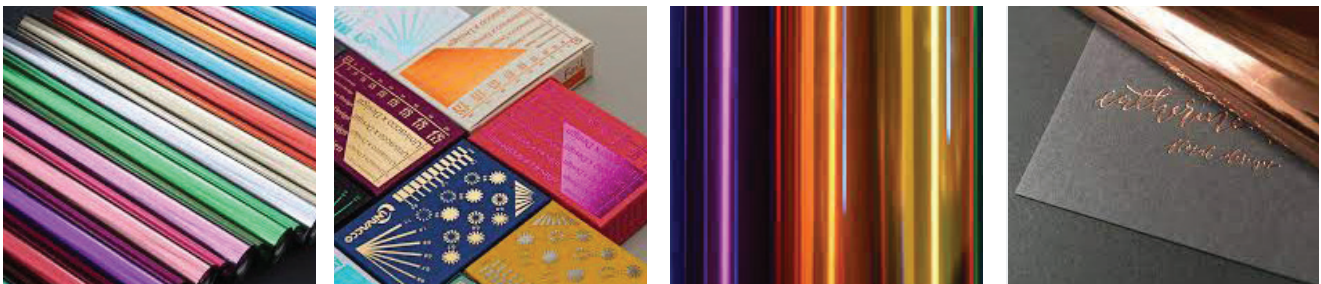

We offer Hot stamping foil YU LA from China and is with many years of history in hot stamping foils and offers the most professional products, technical service, and customer-driven colors. As one of the leading hot stamping foils suppliers in China, they take all efforts to contribute to customer satisfaction and success. YU LA focuses on producing different foils and offers first-class products and the quickest delivery time to customers' choice in colors and sizes.

Our foils are widely used on the packaging, greeting cards, cosmetics, wine bottles, furniture, picture frame, textiles, garments, shoes, bags, and other items which require stamping foil. Dedicated to being specialized in producing a wide range of hot stamping foil. Foil already gains good performance and comment no matter in the Graphic industry or textile and leather industry.

We also offer Cold foils, Holographic foils, over-printable foils, UV casting foils, etc.

Our supplier is also ready for offering below services.,

- Can be matched and offered to any color you need,
- No MOQ
- Quickest production time.
- Can be offered to any width and Length.

Hot Melt Adhesive

Are you producing books ,magazines or brochures? We offer you high-performance adhesives enabling you to achieve the best results for perfect binding applications. **HWA** from Taiwan is with 39 years of experience developing Hot Melt for bookbinding. Their products are suitable for use with rollers or with nozzle systems and can be used on all major high-speed book binding machine types. Our Hot melt adhesives meet the latest standards for safety, health, and the environment.

You could get below advantages when using our adhesive.

- Good range of adhesion
- Low odour
- Good colour stability
- Easy cleaning .
- Good adhesion to difficult paper
- qualities and coated papers.

We also offer Hot melt Animal glue for hardcover and other related requirements, it is with good bonding, low smell, and fast drying. We have a range of products to offer depending on your requirement. Please let me share your application and get the best product for you.

Flexographic Plate Mounting Tapes

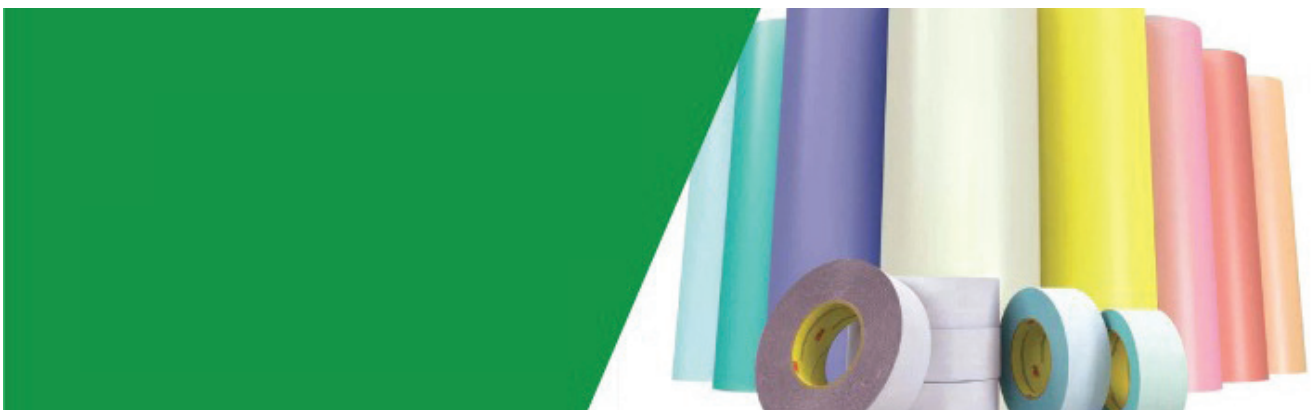

Bondtec a leading Asia industrial specialty tape manufacturer, offers a complete line of industrial tapes for the most demanding industrial and consumer applications, including masking, insulating, thermal spray, protective, plate mounting, and other special industrial tapes.

Flexo plate mounting tapes are one of the best product and fast-moving products they have and sell in many quantities in Asia and Europe. Bondtec tapes make outstanding Performance in Flexo and present fast and efficient plate mounting in the flexographic printing industry. Three-in-one adhesive layers allow repositioning, secure bonding, and easy de-mounting.

We also offer splicing tapes for continuous paper and film printing with a repulpable base. It gives higher bonding to avoid web breaks and is proven for high-speed splicing.

- High adhesive strength
- Repositionable
- Residue and bubble free
- Reusable is desired
- Minimum edge lifting

Thickness : • 0.10mm • 0.20mm • 0.38mm • 0.50mm

Thermal Laminating Films

TOSHEN is one of the pioneer manufacturers of BOPP/PET thermal laminating films produce and supplied in China and offers a wide range of related other products too. The supplier is with vast experience in manufacturing laminating films and added a state of art new film coating machine recently to offer world-class products.

They always stabilize the quality of products that are favored by users at the same time while extensive marketing channels, strict quality management, a professional employee team, and a rigorous supplier management system. They import their base film from KOREA and JAPAN to offer the highest quality product and to give the best whiteness (Snow White).

Available

- Gloss /Matt and High Gloss PET base
- Soft touch and Ani Scuff.
- Metalized Gold /silver
- Holographic effect Thermal film etc..

We also offer plain and with protective film **BOPP/PVC /PP/BOPET** and **PET** films for packaging. This wide used in garment packaging and window patching applications. We can offer in sheet form and reel form to the preferred size.

Double Wire Loops and Hangers

Print finishing Machines for Calendars and Note books.

Punching and Closing machine.

Our supplier for the above products namely, Leung Chong Kee has been in the market for over 60 years and their specialty is making and servicing various print finishing machines for periodical and other print finishing equipment. They are providing sound, reliable, and reasonably priced machines and sell consumables.

Double wire loops and Hangers for Calendars.

- Embossing machines
- Wire/plastic binding machines
- Metal foil
- Wire, plastic materials for book binding

Automatic Blanket Wash Cloth

We provide a full range of automatic blanket washcloth rolls for a variety of press types such as HEIDELBERG, KOMORI, KBA, etc. It is made from a premium, nonwoven material, and our washcloth will not break easily and provide a problem-free wash-up.

This base material is from the USA with higher quality standards. It is lint-free and removes ink thanks to the solvent/water base chemistry adapted for an effective automatic blanket wash on any press. It also shows excellent water absorption and makes the blanket perfectly clean and dry instantly.

We offer the jumbo reel in 500 meters for self-self-re-winding-winding and in retail reels in Wet and Dry.

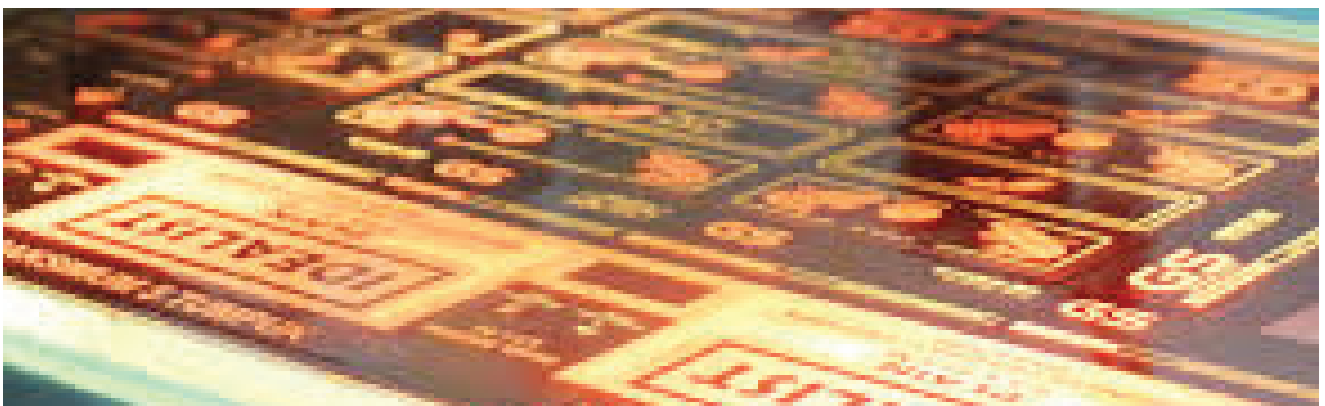

Photo Polymer Plates

MacDermid Printing Solutions

MacDermid Graphics Solutions' Digital, analogy, or conventional sheet photopolymer products are available for virtually any flexographic printing application and any plate-making technology. From flexible film to corrugated boxes, McDermid provides a high-quality sheet photopolymer plate product to fit your needs.

Key Features

- High Resilience
- Excellent Durability
- Low dot Gain.
- Quick Imaging.

Products for Heat transfer printing

Heat transfer Film.

We offer the highest quality heat transfer films and paper from Taiwan. It is with a triple-layer coating to ensure smooth printing and also for quick release. The supplier uses Japanese technology Plus base materials to give consistency in quality. We have both COLD and HOT peel films to offer and several thicknesses to offer such as 50, 75, and 100mic, etc. It can be offered in reel and sheet forms, and it is currently used for world-famous brands,

Heat Transfer Inks-water base & Powders.

Water-based ink system Icoflex IF **iconInks** which is designed for high-quality transfer applications. The Icoflex IF inks were developed for three main parts of the water-based transfer applications:

1. Tagless Transfers – Need high stretch/high wash resistance.
2. Sportswear transfers – Transferred onto polyester materials and need to have some resistance to the nasty sublimated dyes in these materials.
3. Workwear transfers – Need to have high-temperature wash resistance.

The Icoflex IF inks are available as a combination of white/clear, with concentrated pigment liquids added to them, plus adhesives/powders for transfer use. Super stretchable hot melt powders are also available and could use with low temperature and high washing resistance. It is with a different micron range of powder and with OKETEX certification.

Thermal Laminating Machines

We offer a “Guangming” laminating machine that has about 30 years of experience in manufacturing post-press equipment and is a professional company integrating scientific research, design, manufacturing, and service. The strong technology, high quality of “Guangming” products, and perfect after-sale service has helped them to gain the trust of domestic and international users.

The company has been awarded by the governments as “Trustworthy Products”, “Enterprise Abiding by Contract and Keeping Promise”, “Good Faith Enterprise “and “AAA Grade Credit Enterprise “the national high technology enterprise” and has already passed ISO9001:2008 quality management system and CE certificate.

They are the number one thermal laminating machine producer in China and also becoming world-famous laminator manufacturers as two-thirds of their products are being exported.

- Fully automatic machine
- Semi automatic machine
- Manual machine

Screen Printing Machines & Equipments

KEYWELL INDUSTRIAL CO., LTD. was established in 1985 and specialized in manufacturing Screen Printing Machines in Taiwan. Key Well is one of the pioneers in making screen printing machines and related other equipment such as UV Conveyor Dryers, Hot Air Dryers, IR Conveyor Dryers, Screen Coating Machines, Screen Stretching Machines, Exposure Machines, Screen Washing Stands, Squeegee Sharpeners and Screen Ovens...etc.

KEYWELL machines have got very good customer satisfaction, especially in the oversea market and Keywell keeps growing in their presence in the world market in making screen printing machines. Most of their production machines sell to export and continuously develop new technology to ease productivity and user friendly.

Products for Screen Printing

- Packaging Printing Machine
- Advertising printing
- Optoelectronics technology printing
- Glass printing
- Industrial & Electronic products printing
- Screen Printing related equipment

Auto Folder Gluer and Laminator machines

Our supplier for Auto box making equipment, namely PAKTEK INDUSTRIAL CO., LTD in Taiwan established in 1991 and has been specialized in manufacturing Auto Folder Gluer and high-speed auto laminators. To satisfy customers' demand for product quality and capacity, Paktek cooperates with other post-press converting machine manufacturers to provide a total solution line of complete Paper box Making Equipment.

Paktek established a new factory in China too, to expand their production and to offer competitive products with reasonable prices. Paktek uses world-class technical standard mechanical parts and electronic devices to give trouble-free machines.

AUTOMATIC HIGH SPEED FOLDING AND GLUING MACHINE

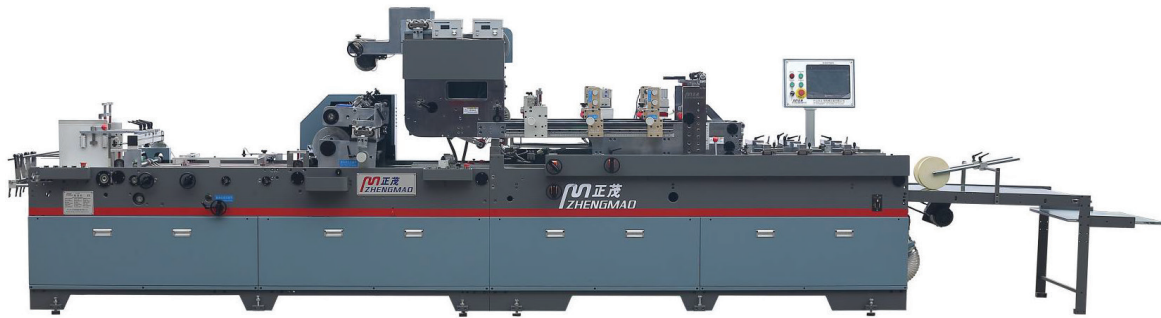

AUTOMATIC DIE CUTTER & CREASING MACHINE

Fully Auto Window Patching Machine

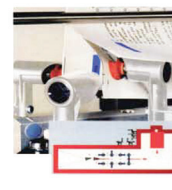

TC - 650 / TC-1050 Window Patching Machine suitable for all type windows. It has a number of functions including patching window, press line, cut corner, embossing logo, punch hole and so on, also has the characteristics of high precision, stability and high performance. User friendly operation, make your work easier and better.

Book Sewing Machine

- Automatic section sewing machine made in TAIWAN.
- Speed from 150 to 220 signature per minutes.
- Quick make ready with minimum adjustment.
- Highest efficiency with least manual interaction.
- Highest durability and less maintenance cost.
